The Kelowna Conference Centre will serve as a catalyst for economic growth and cultural exchange, drawing national and international visitors while supporting local businesses and tourism year-round.

Its forward-thinking design, integrating mass timber, sustainability, and modern hospitality, will redefine the city's built environment and elevate Kelowna's reputation as a premier destination.

ARCADIS

The Conference Centre's architecture, created by the team at Arcadis, embodies a bold vision that blends sustainability, innovation, and cultural identity to set a new standard for design excellence in the region.
